

Compact Portable CCTV Solution

Our latest product integrates wire-free CCTV with our solar powered 'Compact' base, offering increased portability and a reduced footprint compared to other solutions.

Portable CCTV

This outdoor surveillance camera boasts an ultra-wide viewing angle of 355° pan & 140° tilt and connects through Vodafone 4G. Offering 1080p HD at 15 frames per second and a 6x Digital Zoom, this camera performs well for a range of applications, made even more impressive by the 10m Night Vision range.

Its PIR (passive infrared) detection distance is up to 10m too and when combined with the 90° Horizontal PIR detecting angle, this camera is a highly capable solution for security, monitoring work zones and anything else that requires an outdoor HD camera.

Ideal for:

- Security
- Queue management
- Site safety

Solar Powered Compact Base

When combined with our solar powered compact base, the applications of the CCTV camera are much more enhanced. Offering a small footprint, this unit can be deployed in many locations where competing solutions can't be, enabling you to have eyes on the ground in places where it may be dangerous or where there is limited space.

Being solar powered makes the unit even more versatile, preventing the need for an external power source and offering extended run times in recommended conditions.

Our compact base offers the camera not only portability, but also a 3M mast, allowing users excellent visibility when used in conjunction with the camera's pan, tilt and zoom functions.

With hidden cabling, this unit is secured against vandalism or accidental damage and can be easily moved to the client's requirements.

Key Benefits

- 1080p full HD, Starlight CMOS Image Sensor, IP65 weatherproof camera
- Unit security features: GPS tracked and padlock covers
- Operate products remotely via web based or mobile based platforms
- Real-time alerts
- Portable, solar powered compact base
- 24/7 support
- National coverage, allowing for quick deployment

Technical Specifications

Video & Audio

Video Resolution: 1080p HD at 15 frames/sec

Video Format: H.264

Audio: Speaker and microphone for two-way audio

Field of View: Fixed Lens, 105° Diagonal

Digital Zoom: 6x digital zoom

PIR Detection & Alerts

PIR Detecting Distance: Adjustable up to 10 m (33 ft)

PIR Detecting Angle: 90° horizontal

Audio Alert: Siren (customizable)

Other Alerts: Instant email alerts and push notifications

Storage

Local Storage: Supports up to 128GB Micro SD card

Working Environment

Operating Temperature: -10° to 55° C (14° to 131° F)

Weather Resistance: Weatherproof IP65

Compact Base

Length: 880mm

Width: 610mm

Height: 3000mm

Weight: 180kg

Power

Voltage: 12V

Solar Panels: 1 x solar panels

Operation on batteries / solar: Indefinite under recommended conditions
