# Stand out from the crowd with responsive, high impact event traffic management solutions.

We offer portable variable message signs (VMS) and intelligent transport system (ITS) solutions hire to some of the biggest events in the UK. Specialising in solar powered event traffic management products, MVIS delivers solutions that assist with event traffic control, event security/safety and wayfinding, helping events run efficiently and safely.

The safety and enjoyment of visitors and employees is essential to a successful event. So, whether it's a summer festival, sporting event or even a Christmas market, MVIS delivers flexible event traffic management solutions that enable event managers to communicate information effectively and respond to event changes in an instant.

#TRUSTINMVIS

## Our event traffic management products offer solutions for applications such as:

- Traffic or pedestrian wayfinding
- Event security
- On-site communications
- Traffic control
- Festival CCTV
- Advertising & event signage

With a proven track record of effective deployment and success, our products have been tried and tested on some of the biggest events this country has ever seen, such as the 2012 Olympics, Brighton Pride, V Festival, Silverstone and The Grand National.

SLOW  
DOWN!

# HD COMPACT

This unit's small foot print and adjustable height makes it highly versatile, especially considering the display content can be updated remotely via our web-based portal or mobile app.

With hidden cabling, this unit is secured against vandalism or accidental damage and benefits from the data collection radar integrated in all our signs.

# PORTABLE CCTV

## (LOW LIGHT)

- ✓ Invictus ULTRA 32:1
- ✓ HYBRID 1080p
- ✓ Flat, toughened glass window
- ✓ Built-in camera lens wiper
- ✓ ULTRA Low Light.
- ✓ Presets, tours and privacy masking

#TRUSTINMVIS

# ENVIRONMENTAL SENSOR

Our latest solution integrates our solar powered 'Compact' base with an ITS Environmental Sensor, offering clients the ability to monitor the external environment, producing a wide range of air pollution data that can be used to inform and direct on issues of air pollution safety.
