

TROTTM – TEMPORARY ROTTM

This clever system is a 5 sign solution designed to countdown to a lane closure on motorways. With a different message signalled every 200 yards. Starting from a 1 mile trigger point warning and finishing 200 yards from the closure.

With the capability to work on motorways up to 4 lanes. Messages can be triggered manually in 2 ways:

Get Your Message Across

- WebStudio App
- RF Solutions Fob - (*this manual option should only be used if comms is down*).

WebStudio Graphics.

In order to clear the message when no longer needed (end of shift) simply press the same button again.
