

20'S PLENTY - SCHOOL SAFETY SOLUTION

PRIORITISING SAFETY IN SCHOOL ZONES

At MVIS, we have been at the forefront of Variable Message Signs (VMS) and Radar technology for years, using our expertise to develop solutions that improve road safety. Our 20's Plenty School Safety Solution incorporates cutting-edge technology designed to influence driver behaviour and reinforce speed limits in school zones.

Utilising our industry-leading Portable VMS HD Compact in conjunction with MVIS' Radar technology, this solution provides an enforceable and highly visible system to encourage drivers to reduce their speed. Studies show that when drivers see a flashing sign alerting them to their speed, they are significantly more likely to adjust accordingly, leading to a safer environment for school children.

- **DESIGNED FOR SAFETY** - Originally developed for work zones, this unit has been adapted to serve as a vital safety tool in school zones
- **HIGHLY VISIBLE MESSAGING** - Dual-colour (red and white) display ensures clear and immediate communication
- **PORTABLE AND LIGHTWEIGHT** - A compact footprint with adjustable height, making it ideal for placement in school zones
- **SOLAR POWERED** - Environmentally friendly and energy efficient for continuous operation
- **REMOTE CONNECTIVITY** - Messages and alerts can be updated remotely
