GET YOUR MESSAGE ACROSS

The BartcoLive™ app is a powerful, user-friendly VMS programming software solution that gives you complete control over your portable Variable Message Signs (VMS)—wherever you are.

Developed to improve the responsiveness and efficiency of your Intelligent Transport Systems (ITS), this innovative tool allows traffic managers and site operators to remotely update messages displayed on VMS units across the road network in real-time.

## FAST, FLEXIBLE & FULLY MOBILE

The app connects you directly to your fleet of VMS signs via your smartphone or tablet, enabling instant message changes and full visibility of asset status. You can browse and manage your VMS asset list, update messages on the go, and respond dynamically to changing road conditions—all without needing to be at a fixed workstation.

Access asset status information including:

- GPS location
- Battery voltage levels
- Light output level
- Current message displayed
- Communications status
- Controller status
- Controller information
- Map detailing asset location
- Directions to asset location

**Download Today from your Preferred App Store.**
